***If these options are added after we've installed the engine kit there's an additional \$45 "lift fee" in addition to the price of the add-on.**

Additional fees also apply for installing add-ons to lighting packages not installed by us. When we add lights to another's lighting package, we install our fuse and switch to power our lights, preserving the lifetime warranty and resulting in the additional fee.

We do not charge to remove existing lights to replace them with Boogey Lights.
